### IloT Advantage: Industrial Ethernet for Network Reliability

With over 100 mixed-media configuration options, Red Lion's rugged NT24k® all-Gigabit managed industrial switches provide the ultimate in network flexibility.

- Support varied options: Fast Ethernet, Gigabit, Copper, Fiber, SFP and PoE+
- Withstand extreme conditions with rugged environmental specs
- Enable plug-and-play deployment thanks to auto-configuration

# NT24k Industrial Switches Ensure Network Reliability

Flexible, reliable network connectivity is vital for industrial operations. That's why Red Lion's N-Tron® series NT24k all-Gigabit managed switches provide the gold standard for industrial networking. Designed to maximize media options, network speed and switch management, our rugged NT24k platform meets and exceeds industrial networking requirements to enable customers to do MORE across Industrial Internet of Things (IIoT) applications that include factory automation, alternative energy, power, utilities, transportation and oil and gas.

## Features & Benefits

### Connectivity options provide robust migration path

- Rackmount and DIN-rail models
- Over 100 mixed-media configuration options: Fast Ethernet, Gigabit, Copper, Fiber, SFP
- IEEE 802.3af/at Power over Ethernet (PoE) models
- Hot-swappable modular options

### Rugged industrial design for extreme protection

- Wide operating temperatures up to -40° to 85° C
- UL Class I, Division 2 (Group A, B, C and D) and ABS approvals
- High shock and vibration tolerances
- Greater than 1 million hour MTBF rating

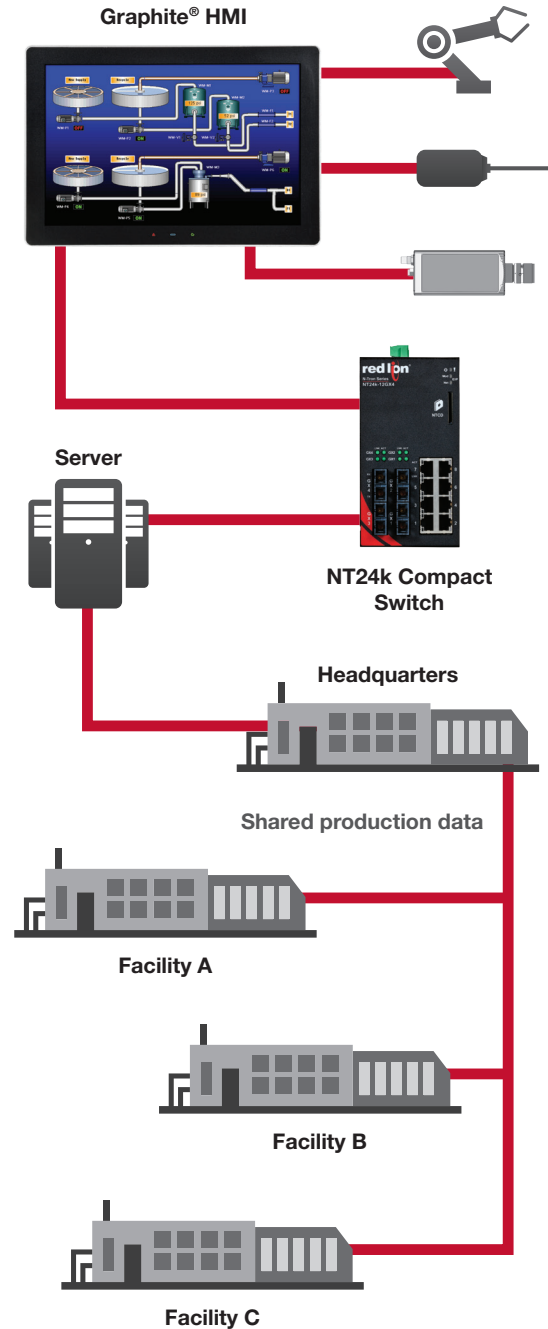

### Reliable performance maximizes uptime

- Easy plug-and-play operation
- Built-in N-Ring™ technology provides 30ms network healing time
- Fully managed Layer 2 functionality

### Remote monitoring and control simplifies management

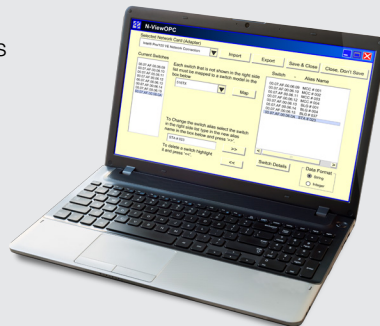

- N-View™ diagnostics and monitoring software
- View real-time switch, port and network-level statistics

Visit [www.redlion.net/ReliableNetworking](http://www.redlion.net/ReliableNetworking) or email [info@redlion.net](mailto:info@redlion.net) to network MORE today.

## N-View Software

- Troubleshoot cabling and system errors with port traffic and error statistics
- View monitoring details on Crimson® 3.0 products
- Includes OPC server for remote monitoring
