# REDLION®

## Model G07 - Graphite<sup>™</sup> Series 7" Color Touchscreen Operator Interface Terminal

## **Installation Guide**

See the Red Lion website at www.redlion.net full user manual, Crimson<sup>®</sup> software and software manual.

#### SAFETY SUMMARY

All safety related regulations, local codes as well as instructions that appear in this document or on equipment must be observed to ensure personal safety and to prevent damage to either the device or equipment connected to it.

Do not use these products to replace proper safety interlocking. No software-based device (or any other solid-state device) should ever be designed to be responsible for the maintenance of personnel safety or consequential equipment not equipped with safeguards. Red Lion disclaims any responsibility for damages, either direct or consequential, that result from the use of this equipment in a manner not consistent with these specifications.

CAUTION: Risk of Danger Read complete instructions prior to installation and operation of the unit.

ATTENTION : Risque de danger Lire les instructions complètes avant l'installation et l'utilisation de l'appareil.

WARNING - Explosion Hazard - Do not disconnect equipment unless power has been switched off or area is known to be non-hazardous.

**AVERTISSEMENT - Danger d'explosion -** Ne as débrancher l'équipement à moins que l'alimentation électrique n'ait été coupée ou que la zone ne soit connue comme étant non dangereuse.

## DIMENSIONS In inches [mm]

$\triangle$						
_						

WARNING - Explosion Hazard - Substitution of components may impair suitability for Class I, Division 2 AVERTISSEMENT - Danger d'explosion - Le remplacement de composants peut nuire l'aptitude à la Classe I, Division 2

### **ORDERING INFORMATION**

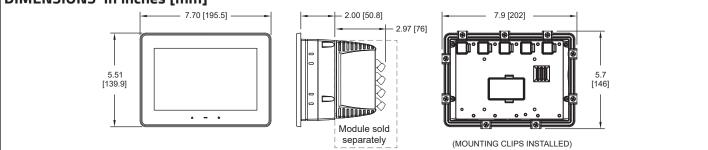

DESCRIPTION	PART NUMBER		
7" Color Touch Screen, Indoor Use	G07C0000		
7" Color Touch Screen, Indoor/Outdoor Use	G07S0000		

## SPECIFICATIONS

POWER:

	G07C			G07S		
Input Voltage	10 V	24 V	30 V	10 V	24 V	30 V
Typical Power HMI only:	7 W	7W	8W	8 W	9 W	9W
Maximum Power HMI only:	12 W	13 W	14 W	13 W	14 W	15 W
Available Power for Modules:	21 W		21 W			
Max Power HMI With Module(s)	33 W	34 W	35 W	34 W	36 W	36 W

Must use a Class 2 circuit according to National Electrical Code (NEC), NFPA-70 or Canadian Electrical Code (CEC), Part I, C22.1 or a Limited Power Supply (LPS) according to IEC/EN 60950-1 or Limited-energy circuit according to IEC/ EN 61010-1.

Power connection via removable three position terminal block. **ENVIRONMENTAL CONDITIONS:** 

Operating Temperature Range: -20 to 60 °C, or lowest range among equipment used in your Graphite system. Consult the user manual or <u>www.redlion.net/OpTemp</u> for further details. Storage Temperature Range: -20 to 70 °C

Vibration to IEC 68-2-6: Operational 5-500 Hz, 4 g

Shock to IEC 68-2-27: Operational 40 g (10 g, modules w/ relays)

Operating and Storage Humidity: 0 to 85% max. RH noncondensing

Altitude: Up to 2000 meters

Installation Category II, Pollution Degree 2 as defined in IEC/EN 60664-1

#### CERTIFICATIONS AND COMPLIANCES:

## **OPERATOR INTERFACE INSTALLATIONS**

#### MOUNTING INSTRUCTIONS

FOOT MAY BE REMOVED FOR THICKER PANEL INSTALLATIONS

This operator interface is primarily designed for through-panel mounting. Four VESA mount tapped screw-holes (M4 x 0.7, 5 mm deep) are present on the rear of the panels to allow for stand or wall mounting. Care should be taken to remove any loose material from the mounting cut-out to prevent that material from falling into the operator interface during installation. A gasket is provided to enable sealing to NEMA 4X/IP66 specification. To maintain the IP66 rating of the panel, an equivalently IP rated enclosure should be used. Install the mounting clips provided and tighten to 6.0 poundforce inch [96 ounce-force inch] (0.68 Nm) evenly for uniform gasket compression.

Provisions should be made to prohibit the product from being exposed to UV radiation while in use. Care should be taken not to rub or buff the touchscreen surface in a way that might cause the accumulation of static charges.

For hazardous location installation, the following shall be taken into consideration.

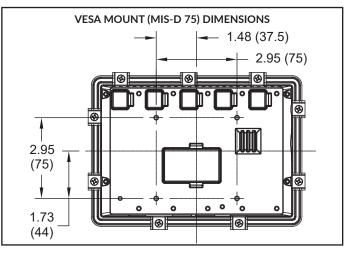

- When used in a Zone 22 environment, the device shall be panel mounted in at least Zone 22 ATEX/IECEx/UKEX-Certified tool accessible enclosure with a minimum ingress protection rating of at least IP64 as defined in IEC/EN 60529.
- When used in a Zone 2 environment, the device shall be panel mounted in at least Zone 2 ATEX/IECEx/UKEX-Certified tool accessible enclosure with a minimum ingress protection rating of at least IP54 as defined in IEC/EN 60529.
- This device is open-type and must be mounted in a suitable dust-tight end-enclosure in accordance with articles 500 and 502 of the NEC and positioned so only the face of the

**IECEx** Approved Ex ic nA IIC T4 Gc Ex tc IIIC T135°C Dc IECEx UL 15.0035X IEC 60079-0, -11, -15, -31 CCC Approved These products have obtained CCC certification and meet the requirements of GB/T3836.1-2021, GB/T3836.3-2021, GB/T3836.4-2021, and GB/T3836.31-2021 India PESO Approved: A/P/HQ/MH/104/7441 (P549599) UL Listed: File #E302106 UL Hazardous: File #317425 Type 4X Indoor / IP66 Enclosure rating (Face only) for all models Type 4X Outdoor Enclosure rating (Rear of unit) for G07Sxxxx models IP20 Enclosure rating (Rear of unit) **ABS Type Approval for Shipboard Applications CONNECTIONS:** High compression cage-clamp terminal block Wire Strip Length: 0.3" (7.5 mm) Wire Gauge Capacity: One 14 AWG (1.63 mm) solid, two 18 AWG (1.02 mm) or four 20 AWG (0.81 mm) CONSTRUCTION: Cast aluminum enclosure with NEMA 4X/ IP66 rating when correctly fitted with the gasket provided. These devices have only been evaluated for low risk of mechanical impact.

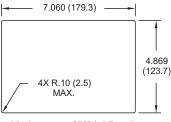

WEIGHT: 2.26 lb. (1.03 Kg)

display is exposed.

- Must be wired using Division 2 wiring methods as specified in article 501-4(b), 502-4(b), and 503-3(b) of the National Electric Code, NFPA 70 for installation within the United States, or as specified in section 19-152 of Canadian Electrical Code for installation in Canada.

All tolerances ±.059" (±1.5 mm)

#### **CONNECTING TO EARTH GROUND**

The third pin of the power connector of the G07 is chassis ground for the unit. Your unit should be connected to earth ground. Steps should be taken beyond connecting to earth ground to eliminate the buildup of electrostatic charges.

The chassis ground is not connected to signal common of the unit. Maintaining isolation between earth ground and signal common is not required to operate your unit. But, other equipment connected to this unit may require isolation between signal common and earth ground. To maintain isolation between signal common and earth ground, care must be taken when connections are made to the unit. For example, a power supply with isolation between its signal common and earth ground earth ground must be used. Also, plugging in a USB cable may connect signal common and earth ground.<sup>1</sup>

<sup>1</sup> USB's shield may be connected to earth ground at the host.

USB's shield in turn may also be connected to signal common.

#### POWER SUPPLY REQUIREMENTS

The G07 requires a 10-30 VDC power supply. Your unit may draw considerably less than the maximum rated power depending upon the features being used. As additional features are used your unit will draw increasing amounts of power. Items that could cause increases in current are modules, additional on-board communications, SD card, and other features programmed through Crimson.

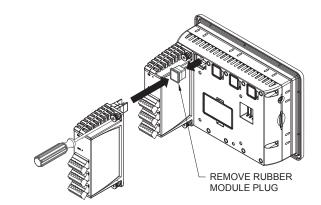

To ensure you do not exceed the capacity of your Graphite host power supply, calculate the total power consumption required for all of your planned modules. Each module's maximum power consumption is listed in the Specifications of their Product Bulletin. The total power available for modules is listed in the specifications of the Graphite host.

In any case, it is very important that the power supply is mounted correctly if the unit is to operate reliably. Please take care to observe the following points:

- The power supply must be mounted close to the unit, with usually not more than 6 feet (1.8 m) of cable between the supply and the operator interface. Ideally, the shortest length possible should be used.
- The wire used to connect the operator interface's power supply should be at least 22-gage wire suitably rated for the temperatures of the environment to which it is being installed. If a longer cable run is used, a heavier gage wire should be used. The routing of the cable should be kept away from large contactors, inverters, and other devices which may generate significant electrical noise.
- A power supply with an NEC Class 2 or Limited Power Source (LPS) and SELV rating is to be used. This type of power supply provides isolation to accessible circuits from hazardous voltage levels generated by a mains power supply due to single faults. SELV is an acronym for "safety extralow voltage." Safety extra-low voltage circuits shall exhibit voltages safe to touch both under normal operating conditions and after a single fault, such as a breakdown of a layer of basic insulation or after the failure of a single component has occurred. A suitable disconnect device shall be provided by the end user.

#### **I/O MODULE INSTALLATION**

The physical order of all installed modules must match the modules order in Crimson. Torque screws to 6.0 pound-force inch [96 ounce-force inch] (0.68 Nm)

 $\mathbf{\Lambda}$ 

**WARNING:** Disconnect all power to the unit before installing or removing modules.

**AVERTISSEMENT:** Débrancher toute alimentation de l'unité avant d'installer ou de retirer des modules.

## COMMUNICATING WITH THE G07 CONFIGURING A G07

The G07 is configured using Crimson software. Crimson is available as a no charge download from Red Lion's website. Crimson updates for new features and drivers are posted on the website as they become available. By configuring the G07 using the latest Crimson version, you are assured that your unit has the most up to date feature set. Crimson software can configure the G07 through the RS232 PGM port, USB port, Ethernet port, or SD card.

The USB port is connected using a standard USB cable with a Type B connector. The driver needed to use the USB port will be installed with Crimson.

The RS232 PGM port uses a programming cable made by Red Lion to connect to the DB9 COM port of your computer. If you choose to make your own cable, use the "G07 Port Pin Out Diagram" for wiring information.

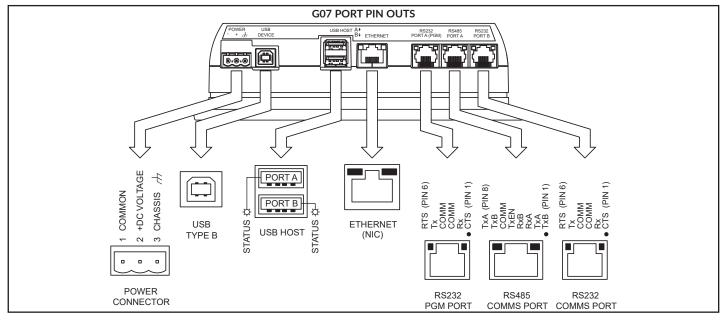

The SD card can be used to program a G07 by placing an image file on the SD card. The card is then inserted into the target G07 and powered. Refer to the Crimson literature for more information on the proper names and locations of the files.

#### USB, DATA TRANSFERS FROM THE SD CARD

 WARNING - Do not connect or disconnect cables while power is applied unless area is known to be nonhazardous. USB device port is for system set-up and diagnostics and is not intended for permanent connection.
AVERTISSEMENT - Ne pas brancher ou débrancher les câbles lorsque l'appareil est sous tension, à moins qu'une zone non dangereuse ne soit connue. l'appareil à port USB est destiné à la configuration et au diagnostic du système et n'est pas destiné à une connexion permanente.

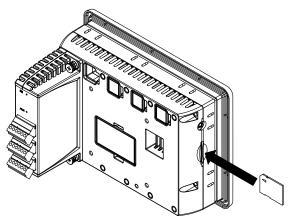

In order to transfer data from the SD card via the USB port, a driver must be installed on your computer. This driver is installed with Crimson and is located in the folder C:\Program Files\Red Lion Controls\Crimson 3.0\Device\ after Crimson is installed. This may have already been accomplished if your G07 was configured using the USB port.

#### **INSERTION/REMOVAL OF THE SD CARD**

Insert the SD card into the slot provided with the card oriented as shown. The card is inserted properly when the end of the card is flush with the Graphite case. To remove the SD card, push in slightly on the SD card.

#### **BATTERY & TIME KEEPING**

WARNING - Explosion Hazard - Disconnect power and ensure the areas is known to be non-hazardous before servicing/replacing the unit and before installing or removing I/O wiring and battery.

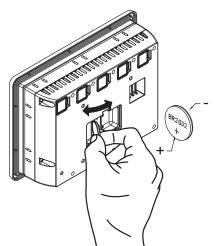

AVERTISSEMENT - Risque d'explosion - Débranchez l'alimentation et assurez-vous que les zones ne sont pas dangereuses avant de réparer/remplacement de l'unité et avant d'installer ou de retirer le câblage d'E/S et la batterie.

A battery is used to keep time when the unit is without power. Typical accuracy (at 25°C) of the Graphite time keeping is less than one minute per month drift. The battery of a Graphite unit does not affect the unit's memory; all configurations and data are stored in non-volatile memory.

#### Changing the Battery

To change the battery of a Graphite, first remove power to the unit. Remove the battery cover. Grasp the top edge of the battery and push to the left to remove the battery from the holder. Lift the battery out and replace with a new battery.

Replace the battery cover, and re-apply power. Using Crimson or the unit's keypad, enter the correct time and date.

\* Please note that the old battery must be disposed of in a manner that complies with your local waste regulations. The battery must not be disposed of in fire or in a manner whereby it may be damaged and its contents could come into contact with human skin.

The battery used by the panel is a lithium type BR2032.
