

## **New N-Tron Facility Opens in Mobile, Alabama** *State-of-the-Art Building Supports Increasing Global Demand*

**York, Pa. and Mobile, Ala. – February 22, 2012** – Red Lion Controls, the global experts in communication, monitoring and control for [industrial automation](#), today announced the opening of a new 19,700-square foot facility at 3101 International Drive in Mobile, Alabama, dedicated to the N-Tron product line. To celebrate this occasion, the company held a ribbon-cutting ceremony that was attended by local officials as well as Red Lion and N-Tron executives and employees. Photos of the ceremony are available upon request.

The new state-of-the-art building houses more than sixty employees in manufacturing, engineering, human resources, finance and other departments. Red Lion's N-Tron [industrial-grade Ethernet](#) switching products are used by customers in industries such as power and energy, oil and gas, manufacturing, water and wastewater treatment, transportation and other industrial environments.

“Our new facility enables us to establish a Center of Excellence in Mobile for designing and building top-quality networking products,” said Mike Granby, president of Red Lion Controls. “This marks our commitment to the N-Tron employees and product line as part of the next phase in Red Lion’s on-going expansion. It also supports our continued pledge to U.S.-based manufacturing and helps to better position us for future growth worldwide.”

In October 2010, N-Tron became part of York, Pennsylvania-based Red Lion. The combined organization is proud to manufacture industrial products in the United States. The Mobile ribbon cutting follows Red Lion’s recent expansion at corporate headquarters to support increased production capacity resulting from growing demand for its industrial automation products worldwide.
