

### Unboxing Video:

Option 1: Welcome to today's video where we delve into the unboxing experience of the Red Lion N-Tron® Series NT5000 Gigabit Managed Switches. Join us as we explore the exceptional features that make Red Lion's gigabit managed ethernet switches the go-to choice for the ease of use, security, and reliability demanded by today's manufacturers and industrial operations.

These switches boast innovative features that simplify installation and setup through an intuitive configuration wizard. Their industry-ready, rugged design ensures seamless operation even in the harshest environments. Authenticated access and VLANs provide an additional layer of security, assuring that only your team can access your devices.
